TECHNICAL SKILLS

Languages & Technologies: C#, Python, SQL, JavaScript, TypeScript, HTML, CSS, REST API, JWT, WebSocket, Socket.IO

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, .NET Core, ASP.NET MVC, Tailwind CSS, MUI, Zustand, Mongoose, LangChain, OpenAI API

Tools & Platforms: Git, Docker, AWS EC2, GitHub Actions, Microsoft Copilot Studio, Jira, MongoDB, SQL Server, Postman, VS Code, Visual Studio, ETL (Informatica)

EXPERIENCE

Jr. Software Engineer

August 2025 – Present

Cognizant

Chennai/Noida

- Architected and deployed a full-stack productivity analytics platform using React and .NET (C#), serving 4,000+ daily active users with real-time reporting dashboards and scalable REST API backend
- Mitigated XSS vulnerabilities in an ASP.NET MVC web application by implementing Content Security Policy (CSP) headers with script-src directives and Nonce-based inline script validation, eliminating client-side injection risks across all application endpoints in compliance with OWASP Top 10 standards
- Automated a manual database processing pipeline by developing a .NET application integrated with SQL Server, reducing data processing time by 97% and eliminating 8 hours of manual effort per month
- Practiced Git-based version control across all projects including feature branching, pull requests, and peer code reviews, ensuring code quality and team collaboration throughout the full development lifecycle
- Engineered an automation agent using Microsoft Copilot Studio integrated with the Jira REST API, enabling real-time sprint story tracking and automated blocker escalation workflows to technical leads, reducing sprint spillover by 20%

Software Developer Intern

Jan. 2025 – June 2025

Blackcoffer

Remote

- Built and optimized core frontend modules for an internal project management platform using Next.js, React, and TypeScript, implementing reusable component architecture and improving UI responsiveness across 20 pages
- Architected automated CI/CD pipelines using GitHub Actions for independent frontend and backend deployments to AWS EC2, eliminating manual deployment overhead and enabling continuous delivery from a single commit trigger across decoupled production environments
- Architected JWT-based authentication with role-based access control (RBAC), enforcing least-privilege access principles across 3 user roles and 20+ protected API endpoints in alignment with application security best practices

PROJECTS

REAL-TIME CHAT APPLICATION | *React.js, Node.js, Tailwind, Zustand*

- Engineered a real-time chat application using React.js, Node.js, and Socket.IO with WebSocket protocol, implementing Zustand state management and Tailwind CSS for responsive UI, supporting real-time bidirectional communication
- Secured a real-time chat application using JWT-based authentication with bcrypt password hashing and Mongoose schema design for users, messages, and conversation threads ensuring efficient data retrieval

CONVERSATIONAL CHAT-BOT | *React.js, Node.js, OpenAI API, LangChain, RAG*

- Engineered an AI-powered document chatbot using JavaScript and LangChain, integrating OpenAI GPT-4 API with Retrieval Augmented Generation (RAG) pipeline implementing document chunking strategies, vector embeddings, and vector database storage to enable precise context-aware information extraction and natural language comprehension

EDUCATION AND CERTIFICATION

Madhav Institute of Technology and Science

Gwalior, MP

Bachelor's in Technology

July 2021 – May 2025

Claude Certified Architect

Certificate ID: 4ic6ov2wfkso

May 2026
